## EXPERTISE & INTEREST

Meteorology, air quality & emission inventorying, environmental data analysis, air dispersion modeling. Strong interest in hands-on weather observation, monitoring, and instrumentation. AERMOD, ArcGIS, Python, R, QA/QC, data cleaning, visualization, technical reporting.

Project management & coordination, compliance & permitting, stakeholder engagement.

Passion for climate science, weather, environmental stewardship and sustainability, and finding solutions to tactical challenges.

## EXPERIENCE

### **EPD Solutions** — *Air Quality Specialist*

February 2024 – *Present*

Lead technical analyses supporting environmental compliance for air quality, greenhouse gas, and energy analyses across California jurisdictions. Strong implementation of multi-project management with competing schedules, varying agencies, stakeholders, and clients to ensure deliverable timelines.

Expanded the firm's technical capabilities in atmospheric dispersion modeling and met analysis, developing workflows, and spearheading modeling training. Including application of meteorological data sets, modeling configuration, and interpretation of atmospheric dispersion/transport processes.

Analyzed large environmental data sets with national and California-standard methodology. Regular preparation of technical reports, visualizations, and presentations for stakeholders communicating complex findings to both technical and non-technical audiences. Support for interdisciplinary projects involving air quality, hotspots, transportation, noise and CEQA documents, emphasizing adaptation to unfamiliar technical challenges.

### **Breathe California Sacramento Region** — *Air Quality Intern*

February 2023 – November 2023

Monitored emerging environmental regulatory developments, synthesizing technical information for internal and external stakeholders. Managed operations of clean transportation programs, community correspondence, partner organizations, and lead agency to support program implementation.

Developed technical graphics, outreach materials, and public-facing communication presentations to translate environmental topics for diverse audiences. Conducted research for environmental compliance and regulations, policy trends, and community impacts to support strategic data-driven program development.

### **ASUCD [Campus Center for the Environment]** — *Assistant Unit Director*

July 2021 – June 2023

Managed within a multifaceted role, daily operations of the 400-plot student-community garden servicing 500 members, as well as the operations of environmental incentive programs and sustainability objectives aimed to inspire and mobilize students and community members towards a common goal of promoting ecological responsibility.

Developed and designed educational graphics, workshop materials, signage, and promotional content to support garden programs, sustainability campaigns, and student engagement efforts. Coordinated volunteers, student leaders, and community members across a wide range of projects, ensuring successful execution of operational and educational initiatives. Led sustainability focused programs promoting waste reduction, resource conservation, and environmental responsibility across the Davis community.

## EDUCATION

### **University of California, Davis** — *B.S in Atmospheric Science.*

September 2019 – June 2023 Davis, CA

Major GPA: 3.0

Vice President of Na Keiki O Hawai'i (2022–2023)

Open Ceilings Publication
